

The Green belt of Auroville Master Plan has 6 villages which all together have 6 times more population that of Auroville & have relatively higher growth rate due to wide ranging work opportunities, primarily created & stimulated by Auroville activities. There is also a good chance, as the image shows, that the most of western Green Belt turns into a continuous 'developed belt' in near future. It is high time that Auroville works more proactively & inclusively, to have a roadmap towards 'harmonious co-existing model' & acts on it.

# Invitation

For the Presentation on

## 'Growth Management Framework for Village Settlements within Auroville Green Belt'
